

## Wamuran Park Home

Nestled in natural bushland in a charming rural setting, Wamuran Park Home is a supported residential service which is home to 70 low care residents who require care, support in daily living, and accommodation.

We are a fully accredited, award winning, level 3 facility. We specialise in Korsakoff's psychosis, alcohol related memory loss, mild mental illness, and intellectual disabilities.

Health and wellbeing of our residents is promoted through safe, comfortable and affordable assisted living accommodation. Our cooks delight in preparing home cooked meals, and accommodation is designed for single or shared rooms to meet resident's social needs.

The home garden, tended by some of the residents, provides an enjoyable activity for residents as well as a source of some fresh, nutritious produce. Birthdays are celebrated and residents with special dietary needs are catered for, with full care for those who require medication assistance.

Visitors and family are encouraged to connect with residents, and our volunteers promote stimulating activities. Our local Doctors and visiting specialists have been part of our home for many years. Staff have worked at the Home for many years and are committed to the provision of personalised services for residents.

Care, Hospitality, Gardening and Maintenance staff provide the care and support the residents require. A staff Chaplain ensures consistent, quality support for residents from someone who is known and familiar to them.

General Practitioners and Specialists and a varied education program for staff, ensures that residents receive optimum care which meets all of their needs.

We do so much in activities, with the assistance of Centacare, our much valued resident support program, taking residents to their loved outings, designed for them to enjoy, and community groups or individuals entertain with concerts, sing-a-longs and parties.

AA meetings are held weekly on site, offering another service to residents. Mentors can be assigned, and independence is encouraged in this popular low care facility as residents join us from all over Queensland, and interstate. There is on-site 24 hour care at Wamuran Park Home. We hope you will visit to see for yourself. We welcome referral agencies to see our services first hand.

Along with the local native wildlife, residents of Wamuran Park Home are able to enjoy the continuing company of their pets.
